

MAKING A HIKVISION VIDEO EXPORT

1: Right click with the mouse to open the menu structure

2: Click menu, enter your *user name* and *password* on the log-in screen

3: Click on playback in the menu structure

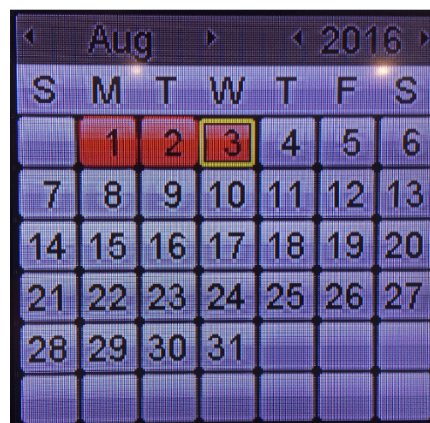

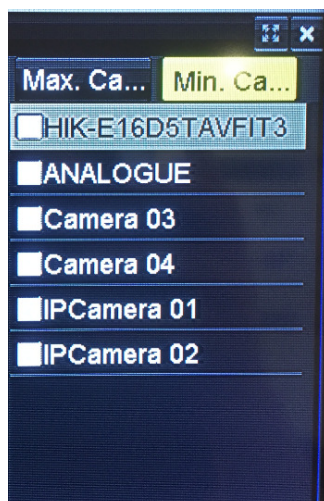

4: This will open the playback menu, see 5,6,7 below for detail

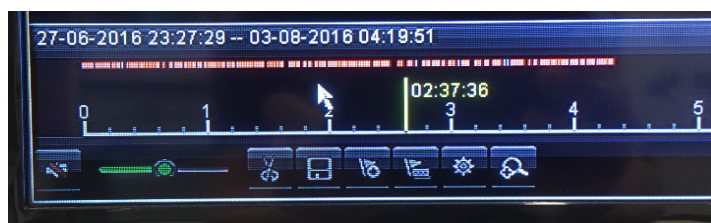

5a: **Top right** click the cameras you want to view

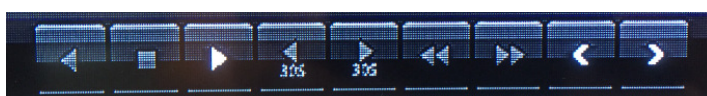

5b: **Bottom right** click the date you want to view, red represents that there is footage

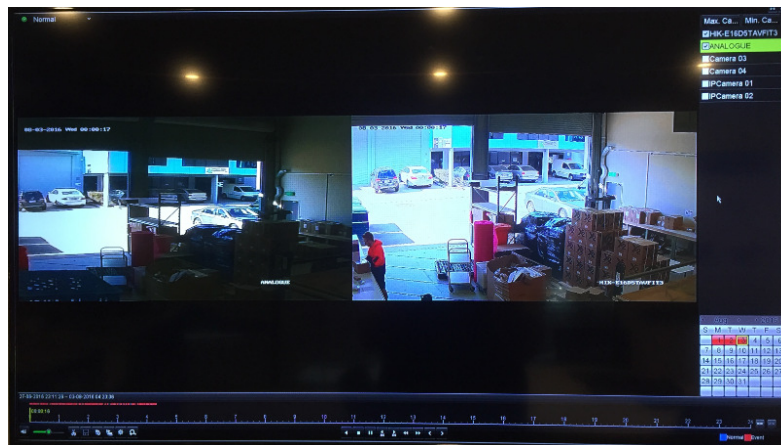

6: **Bottom left** move the mouse along the time bar to pick time of day

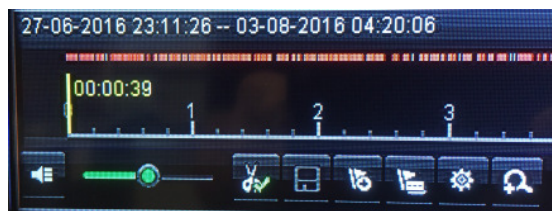

7: **Bottom Centre** click the play symbol to view footage

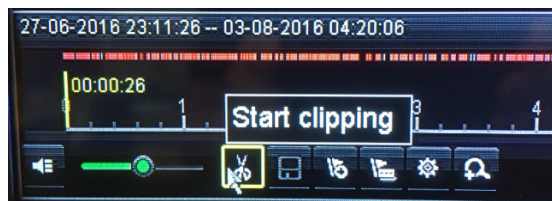

8: The playback screen will now have footage on it, after finding what is required follow the below

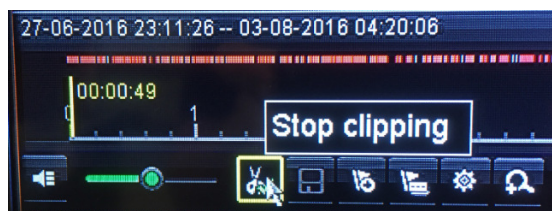

9: **Bottom left** While the footage is playing go to the bottom left of the screen to make a clip

10: **Bottom left** Click *Start Clipping* at the start of the required footage

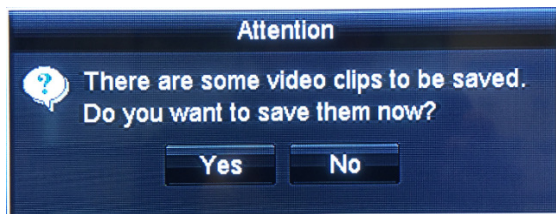

11: **Bottom left** Click *Stop Clipping* at the end of the required footage

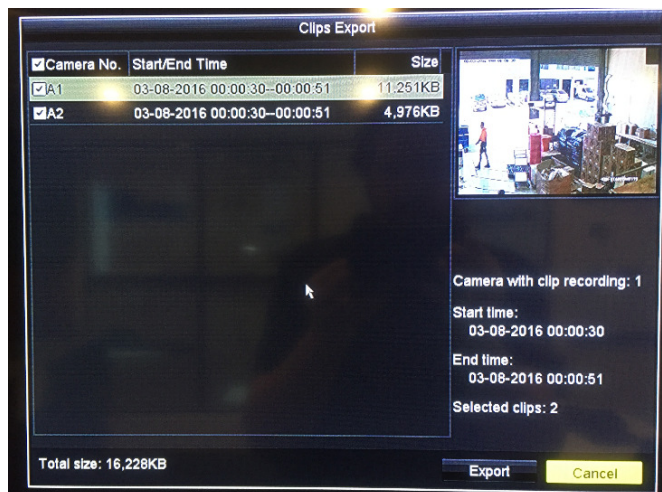

12: **Top right** click the exit icon in the very top right of the screen, you will be prompted to save your clippings to your usb from here

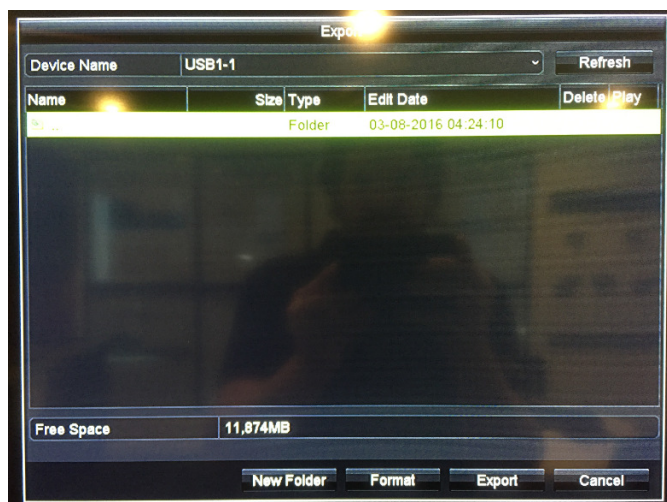

13: you will receive a prompt to save your clips, click yes

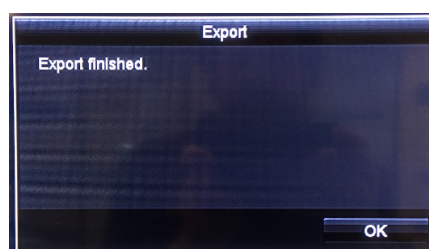

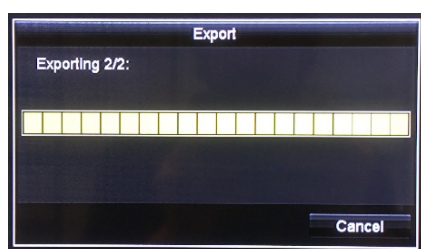

14: On the left select the clips to export by ticking the box, click export in the bottom right

15: insert you USB (Click refresh if not showing on the list), Once you have selected the where you want the files saved to on your USB click export

16: your footage will then start exporting, and you export is complete

17: Open the USB on your laptop and your files are ready to play in m4a format.
